

**The quick and easy,  
self-contained washing stick.**

# Auto Wash Stick

Use to wash cars, vans, boats, motor homes, siding, lawn equipment, lawn furniture, windows, airplanes, and other washable surfaces.

## Instructions

### Assembly

1. Insert pad base into mitt opening as shown.
2. Tighten mitt by sliding cord lock or by tying together same colored strings.
3. **Insert handle with black fitting facing the back as shown.** If not, fitting may touch surface being washed and damage may occur. Screw mitt assembly snugly into handle.

### Washing Instructions

1. Mix warm water and cleaning solution per manufacturer's directions. Bucket needs to be large enough to submerge entire wash head.  
Note: Spray surface with water to be cleaned to remove excess dirt and debris.
2. Submerge entire mitt into cleaning solution. Pull back inner handle to draw solution into clear tube.
3. Push in handle to feed cleaning solution to the wash head as needed. When mitt is in horizontal and down position, the mitt will self feed. Refill when empty.

### Cleaning

1. Fill bucket with clean water and flush by moving inner handle back and forth several times.
2. Make sure mitt is thoroughly cleaned, if needed rinse with garden hose. Mitt should be free of dirt and debris to prevent scratching surface.  
Note: Do not store in areas reaching high temperatures or in direct sunlight.
3. If inner handle becomes difficult to pull back, lubricate o-rings by removing pad base and placing a few drops of liquid dish soap into opening. Pull handle back and forth several times to distribute.
4. Mitt is machine washable; cold water; line dry. Make sure to tie strings before washing.

Not for use with harsh cleaning chemicals or solvents. Do not use with flammable materials.
